Smart Lock Motor GM2227FD

Main Applications

Smart Door Locks

Drive for latch / bolt transmission mechanisms requiring compact packaging, low-voltage operation and repeatable ope

Electronic Cabinet & Locker Locks

Suitable for compact electromechanical locking mechanisms where installation space and controlled actuation are important.

Hotel / Access-Control Lock Mechanisms

Can be evaluated for lock-body actuation requiring repeated cycles and consistent low-voltage drive performance.

Customized Locking Mechanisms

For non-standard lock bodies, the motor, ratio, pinion/interface, lead wire and terminal can be evaluated against the customer's mechanism and test standard.

FAQ

Q1. How can noise be reduced in a smart lock gear motor?

Low-noise performance depends on motor speed, gear material and accuracy, gear ratio, backlash, lubrication, assembly consistency, lock-body resonance, and the control profile. For reliable evaluation, noise should be tested in the actual smart lock mechanism, including startup, running, reversing, and end-position impact, rather than relying only on no-load motor noise.

Q2. Can a smart lock motor still provide enough torque when the battery is low?

Yes, but the motor and gearbox must be selected based on the minimum operating voltage of the battery, not only the rated voltage. Low-voltage testing should simu conditions such as increased latch friction, door pressure,

low temperature, and repeated unlocking to verify starting current, [illegible] torque margin, and temperature rise.

Q3. How should stall or jam protection be handled in a smart lock motor system?

Stall protection should be handled by the motor, lock mechanism, and control system together. Common methods include current detection, operation timeout, end-position detection, reverse recovery, mechanical limits, and fault alarms. Peak current and stall duration should also be controlled to reduce the risk of motor overheating or mechanical damage.

Q4. How do I place an order with Shunli Motor?

Please send us your application requirements or motor specifications. Our engineering team will develop a suitable solution, confirm the technical details, and provide samples for evaluation. Once the samples are approved, we will arrange mass production. Shipping methods can be selected based on your delivery requirements.

Product Overview

Smart Lock Motor - GM2227FD-0001 Series Compact 4.5 VDC Micro DC Gear Motor for Smart Locks, Electronic Locks & Access-Control Actuation The GM2227FD-0001 Smart Lock Motor is a compact 4.5 VDC micro DC gear motor developed for smart door locks, electronic locks, cabinet locks, and access-control mechanisms requiring repeatable low-speed actuation in a space-constrained housing. The supplied technical data identifies a 1:267 reduction ratio with 55 RPM no-load speed, 44 RPM rated speed, 40 mN·m (400 gf·cm) rated torque, and 0.18 N·m (1.8 kgf·cm) stall torque for the GM2227FMN20-09180 gearmotor configuration. The engineering drawing shows a compact 16 mm-wide housing with an external output gear, CW rotation reference, UL1571 26AWG lead wires, and a GH1.25-2P connector. This configuration is suitable for compact lock-body transmission mechanisms where voltage, output speed, current, torque, noise, and mechanical interface must be matched to the actual latch or bolt load. Final selection should be validated in the customer's complete lock mechanism under normal, low-voltage, and repeated-cycle conditions.

Model Information

Model	Motor Type	Product Category
GM2227FD-0001 / GM2227FMN20-09180	DC Brushed Gearmotor	Smart Lock / Electronic Lock Motor

Main Parameters

Technical Data

Rated Voltage	
Gear Ratio	1:267
Gearbox Efficiency	45%–60%
Max. Rated Gearbox Torque	2–3 kgf·cm
Max. Gear Broken Torque	5–6 kgf·cm
No-Load / Rated Speed	55 RPM / 44 RPM
Rated Torque	40 mN·m / 400 gf·cm
Stall Torque	0.18 N·m / 1.8 kgf·cm

Technical Data

Gearmotor Model	Ratio	Voltage	No-Load Speed	No-Load Current	Rated Speed	Rated Curren
GM2227FMN20-09180	1:267	4.5 VDC	55 RPM	≤80 mA	44 RPM	≤180 mA

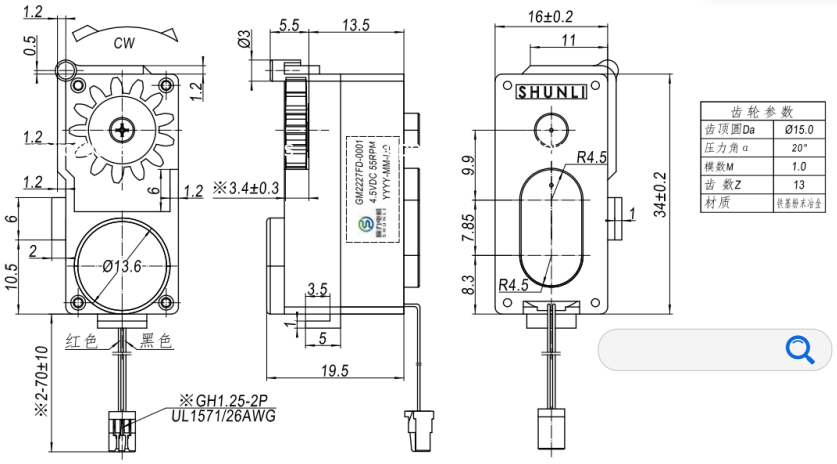

Technical Data

Housing width shown	16±0.2 mm
Overall height shown	34±0.2 mm
Body depth shown	19.5 mm
Output gear	Module 1.0; 13 teeth; 20° pressure angle
Output gear tip diameter	Ø15.0 mm
Output gear material	Sintered iron alloy (per drawing)
Lead wire / connector	UL1571 26AWG / GH1.25-2P
Rotation reference	CW

Dimension Drawing

Main Applications

Industrial Automation

Industrial valves, dampers, gates, low-speed rotary platforms, adjustment mechanisms, and compact actuators requiring right-angle transmission.

Customization Range

- Electrical Configuration
- Working voltage / winding configuration, rotation direction, lead wire length and terminal options.
- Performance Matching
- Gear ratio, target output speed, rated load point, current limit and torque margin based on the real lock mechanism.
- Mechanical Interface
- Output pinion / shaft interface, mounting features and connection to the customer's lock-body transmission.
- Noise & Reliability

Request a Quote

- Gear meshing, backlash, lubrication, motor operating point, assembly consistency and complete-lock resonance optimization.
- Control / Feedback Integration
- Hall sensor, encoder or other feedback functions can be evaluated when required by the project; availability depends on the final structure and specification.

FAQ

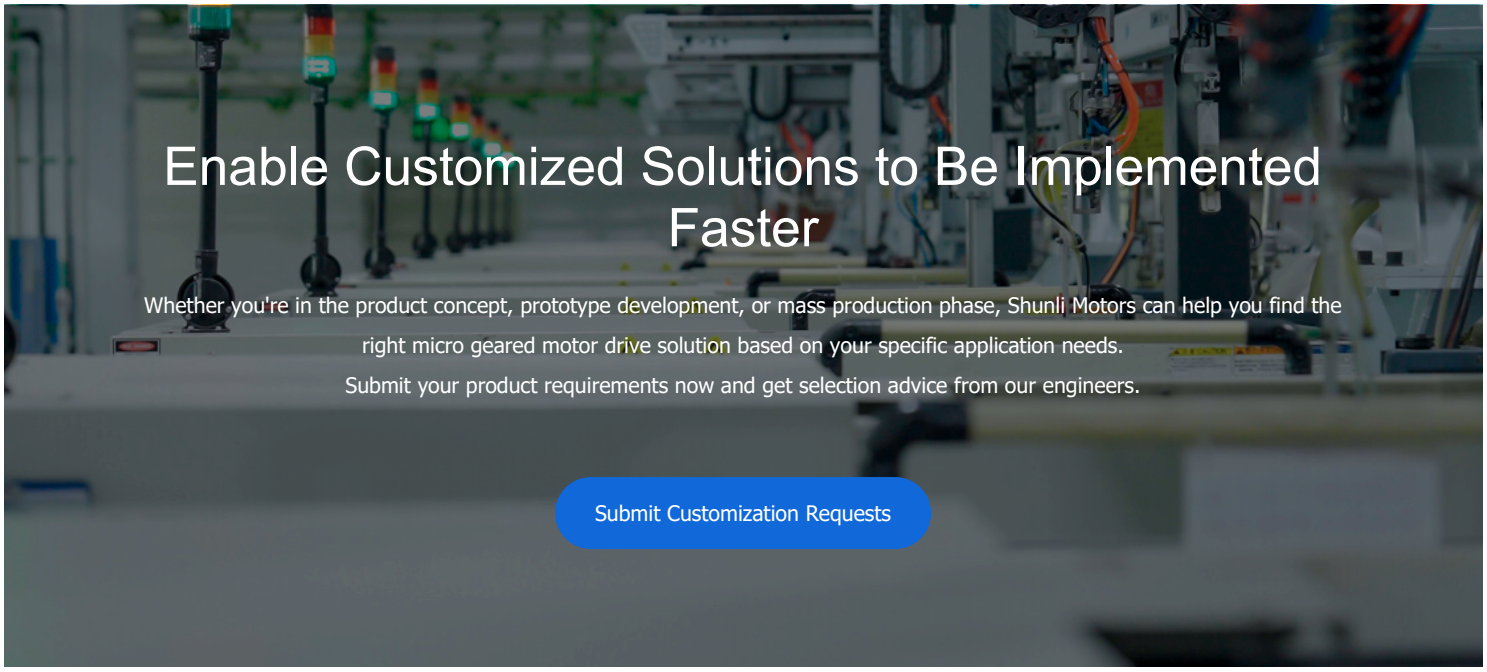

Q1: What types of projects are best suited to the GM5 Gear Motor?

Yes. Provide the product structure, space, load, and motion requirements, and our engineering team can assist with parameter conversion and solution evaluation.

Q2: What types of projects are best suited to the GM58EM DC Worm Gear Motor?

Q3: What types of projects are best suited to the GM58EM DC Worm Gear Motor?

Q4: What types of projects are best suited to the GM58EM DC Worm Gear Motor?

Enable Customized Solutions to Be Implemented Faster

Whether you're in the product concept, prototype development, or mass production phase, Shunli Motors can help you find the right micro geared motor drive solution based on your specific application needs.
Submit your product requirements now and get selection advice from our engineers.
